

## ROCKDALE LIFT REPLACEMENTS

Lift replacements and upgrades delivered in a live rail environment, with works carefully staged to maintain safe, continuous station operations while improving accessibility, performance, and durability.

**SECTOR**

Rail

**LOCATION**

Rockdale, NSW

Cadigal, Gweagal and Bidjigal Country

**CLIENT**

Sydney Trains

**PROJECT COMPLETION**

Lift 2- November 2024  
Lift 1- January 2021

**PROJECT VALUE**

\$1.2M (approximate)

**DELIVERY MODEL**

Construct

These two separate projects included dismantling the existing lifts, installing new lifts, mechanical ventilation, electrical and communication upgrades, structural works, glazing, façade panels, finishes, and lift control systems.

**KEY OUTCOMES**

- Successfully removed existing lifts and installed fully operational replacements
- Completed electrical, mechanical, structural, and communication upgrades, including lift controls, alarm monitoring, and CCTV.
- Delivered façade, shaft, and threshold works, including glazing, painting, and surface rectification.
- Maintained full station operations throughout construction.
- Coordinated works efficiently with station staff to minimise disruption to commuters.

**CHALLENGES OVERCOME**

- Delivering both lift replacement in a fully operational station.
- Coordinating scaffolding, mechanical, electrical, and structural works within tight spatial constraints.
- Sequencing multiple trades to meet program and safety requirements.
- Ensuring all communication, alarm, and control systems were fully integrated and tested.
- Managing access and safety while maintaining passenger flow throughout construction.
