Degnan acknowledges First Nations peoples as the Traditional Custodians of Country and recognises their continuing connection to land, waters and community. We pay our respects to Elders past and present, and extend that respect to all Aboriginal and Torres Strait Islander peoples. We recognise the importance of respecting Country, culture and heritage in the communities where we work.

DEGNAN

MESSAGE FROM
CHRIS DEGNAN

For more than 45 years, Degnan has been trusted to deliver infrastructure in some of Australia's most complex and operational environments.

Since 1979, experience, expertise and relationships have remained at the heart of our business. Combined with the strength of our people, these foundations shape how we approach every project and the long-term relationships we build with clients, partners and communities.

We know successful infrastructure delivery requires more than technical capability. It takes careful planning, collaboration and practical experience to navigate complexity and deliver safe, reliable outcomes.

Proudly Australian owned and operated, Degnan continues to evolve with the infrastructure needs of our clients while remaining grounded in the qualities that have defined our business from the beginning.

CHRIS DEGNAN

Managing Director

FOUNDATIONS OF TRUSTED DELIVERY

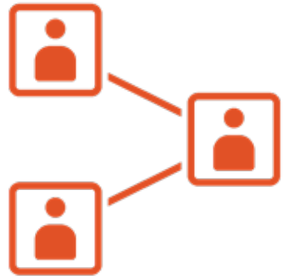

For more than 45 years, Degnan has built its reputation on experience, technical expertise and trusted relationships. As the infrastructure we deliver continues to evolve, these foundations remain the same, shaping how we navigate complexity and deliver practical, lasting outcomes across Australia.

45+ Years of Experience
Delivering complex infrastructure since 1979

1,000+ Projects Delivered
Across diverse infrastructure environments

Live Operational Expertise
Experienced where operations must continue

Technical Excellence
TAO and EEO accredited

Trusted Delivery
Built on experience, expertise and relationships

Australian Owned & Operated
Building Tomorrow Together

SUPPORTING BETTER RAIL NETWORK OUTCOMES

Moss Vale Station and Stabling Yard Upgrade

Infrastructure performs at its best when it supports a network that is reliable, resilient and efficient. Degnan delivers upgrades and renewals that improve asset performance, accessibility and functionality, helping clients get more from the infrastructure their customers rely on.

RELIABILITY

Supporting dependable assets and consistent network performance.

- Renewal and replacement of ageing and critical assets
- Improved lift and escalator reliability and availability
- Enhanced accessibility and passenger amenity
- Improved asset performance and serviceability

RESILIENCE

Strengthening infrastructure for changing demands and long-term performance.

- Upgrades and renewals to existing infrastructure
- Integration of new and existing assets
- Infrastructure adapted to changing network and customer needs
- Infrastructure designed and delivered for long-term performance

EFFICIENCY

Improving how infrastructure performs for clients and customers.

- Improved passenger movement and accessibility
- Enhanced station and interchange functionality
- Modernised infrastructure and assets
- **Practical solutions that support efficient asset performance**

Better infrastructure is measured by how well it performs for the people and networks that rely on it.

COMPLEX & LIVE OPERATIONAL ENVIRONMENTS

DEGNAN

Complex infrastructure is often delivered within environments that cannot simply stop. Degnan combines careful planning, technical expertise and close coordination to manage complexity, minimise disruption and keep operations moving.

Experience matters when operations can't stop. Careful planning, technical expertise and trusted relationships help keep projects and operations moving.

PLAN AROUND OPERATIONS

Planning works around operational requirements, access constraints, shutdowns and available work windows to support safe and efficient delivery.

MANAGE COMPLEX INTERFACES

Coordinating clients, operators, maintainers, stakeholders, delivery partners and disciplines to manage interfaces and support informed decision-making.

MAINTAIN SAFE ACCESS

Carefully managing the interface between construction, operations, customers and communities to maintain safe and accessible environments throughout delivery.

INTEGRATE WITH EXISTING INFRASTRUCTURE

Integrating new and upgraded infrastructure with existing assets and systems to support long-term performance.

FEATURED PROJECTS

Sydney Metro Operations Control Centre

Corinda and Caboolture Substation Upgrades

Calder Park Light Service Facility

Moss Vale Station & Stabling Yard

WestConnex M5 Motorway Control Centre

Broadmeadow Train Maintenance Centre

Planning around operations and access. Como station upgrade

Maintaining safe and accessible environments for all.

Stakeholder coordination. Bellambi Station Upgrade

Integrate with existing infrastructure. Caboolture Substation

HOW **WE DELIVER**

How we deliver is as important as what we deliver. Our approach is grounded in five principles that guide our decisions, strengthen project outcomes and shape the relationships we build.

Safe delivery starts with planning, ownership and action.
Safety is embedded in how we plan, make decisions and deliver, supporting consistent risk management and a strong safety culture across our projects.

Better outcomes come from working together.
We work closely with clients, delivery partners, designers, operators and stakeholders to share knowledge, solve challenges and make informed decisions.

Practical thinking that improves delivery.

We challenge conventional approaches and apply experience, technology and practical innovation to improve constructability, efficiency and long-term outcomes.

Considering the impact beyond construction.
Sustainability informs how we plan, design, procure and deliver, with a focus on practical initiatives that create lasting environmental, social and project value.

Creating value beyond the project.
We consider community needs throughout delivery and seek opportunities to support participation, connection and positive local outcomes.

We work safely, collaborate closely and innovate practically, with a focus on sustainable outcomes and the communities our projects serve.

ASSURANCE & TECHNICAL EXCELLENCE

DEGNAN

Strong project outcomes rely on robust technical, safety, quality and environmental systems. Our accreditations provide assurance that Degnan has the frameworks and capability to deliver within complex and highly regulated infrastructure environments.

TECHNICAL ASSURANCE

TAO | Technically Assured Organisation
Transport for NSW

EEO | Endorsed Engineering Organisation
Queensland Rail

These accreditations recognise Degnan's technical assurance and engineering capability within regulated rail environments.

DELIVERY ASSURANCE

FSC | Federal Safety Accreditation

Independent recognition of the systems and processes supporting Degnan's approach to safety in high-risk and regulated environments.

ISO 9001 | Quality Management Systems

ISO 14001 | Environmental Management Systems

ISO 45001 | Occupational Health & Safety Management Systems

Assurance matters. Our accreditations reinforce the technical expertise, systems and standards behind trusted delivery.
